ISACA CRISC Boot Camp

Learn the principles and practices of IT governance. Build your knowledge around how IT risk relates to your organization and prepare to earn your Certified in Risk and Information Systems Control (CRISC) certification.

Course description

Infosec's CRISC Boot Camp is designed for IT professionals who are tasked with identifying, assessing and evaluating organizational risk. You'll learn about identifying and evaluating entity-specific risk, as well as how to help enterprises accomplish business objectives by designing, implementing, monitoring and maintaining risk-based, efficient and effective information systems controls.

You'll leave fully prepared to earn your CRISC, one of the most in-demand certifications a risk professional can achieve.

Who should attend

- » IT and risk professionals
- » Business analysts
- » Project managers
- » Compliance professionals
- » Anyone tasked with identifying, evaluating and mitigating organizational risk

Boot camp at a glance

What you'll learn

- ✓ Understand and articulate business risk
- ✓ Implement appropriate IS controls
- ✓ Develop effective plans to mitigate risk

Delivery methods

- ✓ Online
- ✓ In person
- ✓ Team onsite

Training duration

- ✓ Immediate access to Infosec Skills
- ✓ 3-day boot camp
- ✓ 90-day extended access to all boot camp materials

The hands-on cybersecurity training platform that moves as fast as you do

Infosec Skills boot camps are engineered to match the way today's cybersecurity professionals prefer to learn. In addition to days of live training from an experienced pro, you'll get unlimited access to 100s of additional hands-on cybersecurity courses and cyber ranges to help you advance your skills before, during and after your boot camp. Your Infosec Skills access extends 90 days past your boot camp, so you can take additional time to prepare for your exam, or get a head start on your next certification goal.

Start training immediately

Prepare for your boot camp with immediate access to the Infosec Skills on-demand training library.

Learn by doing in the cyber range

Put what you've learned into practice with 100s of browser-based labs and hands-on projects.

Get unlimited custom practice exams

Uncover knowledge gaps with unlimited practice exams attempts and skill assessments.

700+ IT and security courses

Earn CPEs and build new skills with 100s of additional training courses.

What's included

- » Three days of expert, live CRISC training
- » Exam Pass Guarantee
- » Exam voucher
- » Unlimited practice exam attempts
- » 100% Satisfaction Guarantee
- » Free 90-day Infosec Skills subscription (access to 1,400+ additional courses and labs)
- » 90-day extended access to all boot camp video replays and materials
- » 12-month subscription to the ISACA Official Question, Answer & Explanation (QAE) Database
- » Pre-study learning path
- » Knowledge Transfer Guarantee

Prerequisites

There are no prerequisites to take the exam. However, in order to apply for certification you must meet the necessary experience requirements as determined by ISACA: a minimum of three years of cumulative work experience performing the tasks of a CRISC professional across two of the four CRISC domains. Of these two required domains, one must be in either domain 1 or 2 (risk identification or assessment).

What you'll learn

- » Identify risks related to an organization's internal and external business and IT environments
- » Identify potential threats and vulnerabilities to the organization's people, processes and technology
- » Develop and analyze IT risk scenarios to determine potential impact
- » Identify the effectiveness of existing controls
- » Identify key stakeholders and assign risk ownership
- » Communicate results of risk assessments
- » Consult with risk owners on the design and implementation of mitigating controls
- » Define and establish data driven key risk indicators
- » Monitor changes in risk indicators
- » Report risk indicator changes to key stakeholders
- » Analyze risk indicators to determine the effectiveness of existing controls

CRISC objectives

This boot camp prepares you to pass the ISACA CRISC exam, which covers four domain areas designed to reflect the work performed by IT risk professionals:

- » Domain 1: Governance
- » Domain 2: IT risk assessment
- » Domain 3: Risk response and reporting
- » Domain 4: Information technology security

ISACA Accredited Training Organization (ATO)

Infosec is an ISACA-accredited Elite+ Partner. When you enroll in an Infosec CRISC Boot Camp, you will receive the most effective and up-to-date certification prep available, including official ISACA training materials and instruction that has been independently assessed to meet ISACA's quality standards.

Skill up and get certified, guaranteed

Exam Pass Guarantee

If you don't pass your exam on the first attempt, get a second attempt for free. Includes the ability to re-sit the course for free for up to one year.

100% Satisfaction Guarantee

If you're not 100% satisfied with your training at the end of the first day, you may withdraw and enroll in a different online or in-person course.

Knowledge Transfer Guarantee

If an employee leaves within three months of obtaining certification, Infosec will train a different employee for free for up to one year.

What our students are saying

I really appreciate that our instructor was extremely knowledgeable and was able to provide the information in a way that it could be understood. He also provided valuable test-taking strategies that I know not only helped me with this exam, but will help in all exams I take in the future.

Michelle Jemmott

Pentagon

Excellent! Our instructor had a vast background and related the materials to real life. Much better than just teaching the materials to pass an exam ... but he did that as well. He went out of his way in class. The extra materials really benefited us when we returned to our real jobs! Great experience!

John Peck

EPA

Very impressed with Infosec. My instructor did a great job delivering the information strategically and in a way for all to understand. I would definitely take another class/certification prep course.

Sylvia Swinson

Texeltek

The instructor was able to take material that prior to the class had made no sense, and explained it in real world scenarios that were able to be understood.

Erik Heiss

United States Air Force

The course was extremely helpful and provided exactly what we needed to know in order to successfully navigate the exam. Without this I am not confident I would have passed.

Robert Caldwell

ISACA CRISC details

Our instructors give you 100% of their time and dedication to ensure that your time is well spent. You receive an immersive experience with no distractions! The typical daily schedule is:

	Day 1	Day 2	Day 3
Morning session	Introduction to CRISC exam and preparation methodology	IT risk assessment	Risk response and reporting cont.
Afternoon session	Governance	Risk response and reporting	Information technology and security
Evening session	Optional group & individual study	Optional group & individual study	Optional group & individual study

Schedule may vary from class to class

Before your boot camp

Start learning now. You'll get immediate access to all the content in Infosec Skills, including an in-depth CRISC prep course, the moment you enroll. Prepare for your live boot camp, uncover your knowledge gaps and maximize your training experience.

During your boot camp

Domain 1 - Governance

Organizational Governance A

- » Organizational Strategy, Goals, and Objectives
- » Organizational Structure, Roles, and Responsibilities
- » Organizational Culture
- » Policies and Standards
- » Business Processes
- » Organizational Assets

Risk Governance B

- » Enterprise Risk Management and Risk Management Framework
- » Three Lines of Defense
- » Risk Profile

- » Risk Appetite and Risk Tolerance
- » Legal, Regulatory, and Contractual Requirements
- » Professional Ethics of Risk Management

Domain 2 - IT risk assessment

IT Risk Identification A

- » Risk Events (e.g., contributing conditions, loss result)
- » Threat Modelling and Threat Landscape
- » Vulnerability and Control Deficiency Analysis (e.g., root cause analysis)
- » Risk Scenario Development

IT Risk Analysis and Evaluation B

- » Risk Assessment Concepts, Standards, and Frameworks
- » Risk Register
- » Risk Analysis Methodologies
- » Business Impact Analysis
- » Inherent and Residual Risk

Domain 3 - Risk response and reporting

Risk Response A

- » Risk Treatment / Risk Response Options
- » Risk and Control Ownership
- » Third-Party Risk Management
- » Issue, Finding, and Exception Management
- » Management of Emerging Risk

Control Design and Implementation B

- » Control Types, Standards, and Frameworks
- » Control Design, Selection, and Analysis
- » Control Implementation
- » Control Testing and Effectiveness Evaluation

Risk Monitoring and Reporting C

- » Risk Treatment Plans
- » Data Collection, Aggregation, Analysis, and Validation
- » Risk and Control Monitoring Techniques
- » Risk and Control Reporting Techniques (heatmap, scorecards, dashboards)
- » Key Performance Indicators
- » Key Risk Indicators (KRIs)
- » Key Control Indicators (KCIs)

Domain 4 - Information technology and security

Information Technology Principles A

- » Enterprise Architecture
- » IT Operations Management (e.g., change management, IT assets, problems, incidents)
- » Project Management
- » Disaster Recovery Management (DRM)
- » Data Lifecycle Management
- » System Development Life Cycle (SDLC)
- » Emerging Technologies

Information Security Principles B

- » Information Security Concepts, Frameworks, and Standards
- » Information Security Awareness Training
- » Business Continuity Management
- » Data Privacy and Data Protection Principles

After your boot camp

Your Infosec Skills access extends 90 days past your boot camp, so you can take additional time to prepare for your exam, get a head start on your next certification goal or start earning CPEs.

About Infosec

Infosec's mission is to put people at the center of cybersecurity. We help IT and security professionals advance their careers with skills development and certifications while empowering all employees with security awareness and phishing training to stay cyber-safe at work and home.
