

Keep your employees secure at home

If your organization is like many around the globe, you're transitioning to a remote workforce. Although this shift introduces new business challenges, you can significantly reduce your organization's cyber risk by helping your employees adopt secure habits.

At Infosec, we want to help you reinforce secure behaviors for remote employees to lighten the burden on your security teams and protect your organization.

Use our Remote Working Awareness Kit to communicate best practices, provide employees with resources for staying secure and gauge your organization's phishing susceptibility.

What's included

Working remotely training video (3 minutes): Teach employees the basics of staying secure when working on a remote network with this short video. [Watch here.](#)

Security at home infographics: Share actionable security tips your employees can print out and reference at any time. [Download infographics.](#)

Internal security announcement email template: Use this template to communicate the importance of staying secure at home and deliver your training resources. [Download template.](#)

Phishing Risk Test: Do you want to gauge the phishing susceptibility of your remote workforce? Run a free Phishing Risk Test, and we'll send your results in 24 hours. [Run free test.](#)

About Infosec
